MEMORANDUM FOR: All Supporter Group Participants

SUBJECT: The new Supporter Group Network

Since September 2022, we have been transitioning away from the old TRS Pool Party network into being an NJP Supporter Group network. This has been a slow and not altogether smooth process, but one that we are close to completing.

The old Pool Party network was a loose collection of both fans and nonfans of TRS, united by little more than geography. Pool Parties were largely politically inactive and could be described as drinking clubs. The largest events put on by the Pool Parties were the TRSlemania gatherings, which had no political goals and did little to advance the cause of our race and our struggle.

When the National Justice Party launched on August 12th, 2020, we had as our primary base of support these disparate collections of individuals, many of whom were resistant to change and unwilling to move away from the casual association of the Pool Party towards being part of a structured collective organization that is oriented at a single goal: advocating for White Americans

There are two things that any political movement needs to succeed: people and money. Scattered social clubs are not conducive to the rapid growth we need in order to achieve our political aims. Extending the hat for donations at mass meetings barely covered the cost of hosting events.

Change was needed, and to that end, at my direction, the Party initiated the Supporter program, and began the process of transitioning the Pool Parties to Supporter Groups.

We are moving forward and developing best practices and methodologies through trial and error just as much as through effective planning. We are aware that there are many things we can do better, and we are focused on making sure that we learn the lessons from our missteps, and improve going forward. Our current goal is to acquire ballot access in at least two states by 2026, which, combined with an activism campaign, will materially affect the 2026 midterms and allow us to supplant the Libertarians and the Greens as “The” third party in America. This goal, while small in the grand scale of things, is something that will shake the foundations of American politics when it is achieved. All our effort and energy is being directed at creating an organization which will be able to achieve it through dedication and discipline, and not through luck.

Our last event in Florida was a stunning success, with approximately 250 attendees. This was the first NJP meeting put on outside of Ohio and Pennsylvania, and it showed that our organizational and planning model can be exported to elsewhere in the country. The majority of attendees were Supporters, people who are supporting the Party not just morally, but with a material sacrifice. Our events are now being planned many months in advance by people who, at this point, have years of experience in doing so.

The focus for the remainder of this year is to create the infrastructure – in both people and institutions – that will allow us to organize semi-publicly in 2025, and publicly in 2026. As part of this process, there will be many more changes that will be communicated to you in the coming months.

The old Pool Party leaders have all met with representatives from the NJP, and those who passed re-vetting are now official Supporter Group Directors. These men are our eyes and ears on the ground in their respective areas, are dedicated to our mission, and are responsible for vetting in new people and organizing existing Supporters. For the few who were uninterested in our program moving forward, replacements have been selected, and the surge of new people applying for vetting guarantees that they will be busy as they build up their new Supporter Groups. At this point every state Supporter Group in the country has a backlog of people awaiting to be vetted, and more people apply every single day. Despite all the censorship, lies, smears, and general bad faith attacks upon us, we are experiencing our time in the sun. Doom prophets who have predicted our collapse and fall have been proved wrong at every turn. It is very true that we face many challenges as an organization, and that Supporters face risks as

individuals. But these challenges can only be overcome through greater organization, greater discipline, and greater solidarity by us – and they will be.

Lastly, I am personally asking each and every person reading this to bring in one additional Supporter this year from your existing social circles. We want to be doubling our numbers annually, and although this seems like a lofty goal, if everyone brings in just one additional person, we will meet it. We need to break through the media blackout of our Party, and the surest way to do that is for every one of you to approach someone you know in person, and bring them over to becoming a full-fledged Supporter. If we are not growing, we are dying, and now thanks to Supporters like you, for the first time ever, we have a solid foundation from which to grow.

Mike Peinovich
Party Chairman &
Chairman of the Central Committee
National Justice Party
